

MAGNETIC CRYOTHERAPY KIT : HOCK

3 in 1 effects:

- Cryotherapy
- Compression
- Magnetic field

OUR SYSTEM

Our Equi'Nov kits have been designed to aid recovery after trauma or exercise.

They have an analgesic action and generate anti-hemorrhagic, anti-edematous and muscle-relaxing effects.

Our magnetic fabric  reduces pain and swelling, while stimulating blood circulation. It promotes toxin elimination, healing and recovery. Finally, it helps prepare muscles and tendons for exertion.

Available in adjustable universal size.
